Business Analyst | Insurance Systems & Data | Guidewire PolicyCenter & BillingCenter

PROFESSIONAL SUMMARY

Business analyst with 10 years in P&C insurance across personal auto and commercial specialty lines, with hands-on Guidewire PolicyCenter and BillingCenter experience from v7 through Cloud, including a v7-to-v9 upgrade. Serves as the business point person between underwriting, billing, project, and engineering teams: writing requirements, testing end to end, demoing solutions, and seeing production issues through to resolution. Writes SQL with complex joins, window functions, and aggregation to reconcile data across integrated systems. B.S. in Computer Information Science; NVIDIA AI certified.

SKILLS & QUALIFICATIONS

- **Guidewire & P&C:** PolicyCenter and BillingCenter (v7, v9, Cloud); personal auto and commercial specialty/E&S; billing, commissions, forms, regulatory reporting
- **Requirements & Delivery:** business requirements, functional specifications, user stories, acceptance criteria (Gherkin), Agile/Scrum
- **Testing:** end-to-end, integration, and upgrade testing; regression; UAT; fix validation
- **Data & SQL:** SQL Server/SSMS (complex joins, window functions, aggregation), data mapping, cross-system reconciliation, Python, Excel
- **Production Support:** level 2 support, triage, root-cause analysis, ServiceNow access requests and incident tickets
- **Communication & Tools:** stakeholder demos (PowerPoint), Jira, Confluence, Lucidchart; AI tools (Claude, ChatGPT, Atlassian Rovo)

PROFESSIONAL EXPERIENCE

Business Analyst

Markel Corporation | Glen Allen, VA | May 2025 – Present

- Serve as the business point person between underwriting, billing, project, and engineering teams across five integrated applications including Guidewire BillingCenter (Cloud); triaged and resolved 80+ production defects
- Led reconciliation of 40+ premium, commission, and fee discrepancies between the policy system and BillingCenter (some exceeding $5,000), tracing root causes with SQL and sequencing corrections to protect downstream financial reporting
- Defined requirements for and demoed a self-service bulk utility that replaced one-by-one deal status updates with a single batch action; its success led to expanding it to additional status changes
- Built the SQL for a Texas regulatory report (HB 2067), joining 10+ tables, using window functions to isolate the latest contract snapshot per deal, and aggregating results into the state's fixed-width file format
- Recommended proactive UI filtering over reactive error alerts to prevent duplicate fee entries, stopping errors at the source
- Support compliance and system-readiness work for a New Jersey regulatory change effective October 2026, preparing workflows and policy systems ahead of the deadline

Antonio Diaz

Richmond, VA | A.C.Diaz92@gmail.com

Product Business Analyst II *(promoted from Product Business Analyst I, May 2022)*
Elephant Insurance | Richmond, VA | Sept 2019 – Nov 2024

- Performed extensive end-to-end testing during the Guidewire v7-to-v9 upgrade, validating that quote and bind data passed accurately from the online customer journey into PolicyCenter, whether bound online or completed directly in PolicyCenter
- Validated Customer Portal integrations through the upgrade, confirming policy changes processed correctly into PolicyCenter and BillingCenter
- Presented feature demos to stakeholders using PowerPoint, including an external agency portal, walking through each change and how it functioned
- Coordinated an A/B test of a customer portal UI change, splitting exposure by even and odd policy numbers to compare the new experience against the existing one
- Facilitated Guidewire integrations that improved automation of billing processes
- Used SQL to validate data prefill enhancements in XML requests and responses before release

Billing Associate II
Elephant Insurance | Richmond, VA | Aug 2016 – Sept 2019

- Ran SQL reports in SSMS, validated with Data Analytics, to identify and correct billing discrepancies and review bad-debt policies for collections
- Managed high-volume billing and policy updates in Guidewire BillingCenter, improving processing accuracy
- Performed comprehensive UAT for billing workflows, identifying recurring system issues
- Drove resolution of operational issues in partnership with development teams

PROJECTS

Billing Delinquency Analytics – Oracle SQL, Oracle APEX, Python
github.com/antdia4309/billing-delinquency-analytics

- Built an interactive Oracle APEX dashboard and autopay what-if tool on a synthetic P&C billing dataset (20K policies, 131K installments) generated in Python
- Wrote Oracle SQL using CTEs, window functions (RANK, LAG, RATIO_TO_REPORT), and regression functions to segment delinquency risk, evaluate a reminder-email A/B test, and forecast missed-payment trends; documented findings and selection-bias caveats on GitHub

EDUCATION

ECPI University – Richmond, VA
B.S. in Computer Information Science – *Software Development* | Graduated July 2025, Summa Cum Laude

CERTIFICATIONS

NVIDIA: Fundamentals of Deep Learning (Oct 2025) | Applications of AI for Predictive Maintenance (Dec 2025)
